

MONOLITHIC
DESIGNSTUDIO

Powerful and resolute, the Monolith Collection aims to impose a resilient presence as you enter the room. Pieces are brought to life through a feeling of permanence, personality and unyielding durability, and yet with a slight change of perspective, will narrow to the slimmest of silhouettes and integrate seamlessly into their surroundings. Where at one glance an impenetrable wall becomes a sweeping vista, Monolith sits at the intersection of art and generational impact, eschewing the temptations of fast-furniture brands to design from margins. Pieces are actualized from earthen, infinitely recyclable and nearly indestructible materials designed to be loved and enjoyed for generations.

THE MONOLITH COLLECTION

FLECTION CHAIR

The Flection Chair is an enduring, sculptural lounge chair; defined by a hand-forged, industrial strength and forthright silhouette. Carefully calibrated proportions lend comfort and refinement to a mutable form that dramatically shifts with perspective. The Flection Chair demonstrates elegant minimalism, merging planular balance with harmony and grace.

6 FINISHES | 1/8" HOT-ROLLED STEEL | SLEEK POWDER COATING

DIMENSIONS

SEAT BACK HEIGHT 27 3/4"
SEAT HEIGHT W/O CUSHION 18"
SEAT HEIGHT W/ CUSHION 20"
SEAT DEPTH 18 1/2"
SEAT WIDTH 18"
BASE DIMENSIONS 23X18"

\$1600

\$1800 WITH CUSTOM LEATHER CUSHION

FLECTION BARSTOOL

The Flection Barstool is consistent in form to its relative, the Flection Chair, but at greater heights. Clean, geometric planes evoke an extraordinary visible depth through bold minimalist elements and curated highs and lows. The Flection Barstool expresses comfortable, contemporary luxury with vitality and ingenuity.

6 FINISHES | 1/8" HOT-ROLLED STEEL | SLEEK POWDER COATING

SCOPE BENCH

Monolithic Design was created to bring a blend of unique materials and aesthetic to life through mediums I'm most passionate about. A general obsession with automotive design evolved into over five years of custom automobile projects, from off road to race, inspired by a strong draw to clean lines, impeccable proportions and the angles of the 80s. That sentiment has carried over to Monolithic Design, which now serves as a vessel where I can bring my visions to life across form, format and function. The intention for this studio was never to stay small; I build big and plan to scale from a local business to operations and manufacturing that match demand, while maintaining space for current vehicle projects and unique clients.

The overall intention is to create an umbrella space under which collections and special projects can blossom along the same aesthetic margins. Freedom to explore the landscape of minimalist and contemporary design drives our process for producing bespoke items that merge resilience and luxury with user experience and spatial integration, though we focus on furniture and homewares. It remains crucial to studio ethos to strike an honest balance between environmental efficiency and highly crafted, industrial design; all projects are imagined, prototyped, and fully created in my Cincinnati studio.

I believe that great design should be accessible and ever-lasting, versatile and earthen, with an artistic edge to set it apart. From conception to home, great care is taken over the entire creative process in hopes that Monolithic Design becomes a home for form, function, quality and elegance to align in the most considered way. We look forward to creating something unique and special for you, and deeply value like-minded connections, collaboration and shared fascinations. Should any of these passions resonate with you, please reach out.
